

SPRITE+: Challenges in Trust, Identity, Privacy, Security in the Next 5-10 Years

What are we doing?

We would like to collect your views on the challenges to trust, identity, privacy and security in digital contexts that you envision in the next 5-10 years. These will be used to inform a wider discussion about the direction of [SPRITE+](#) project.

What data will we collect?

We collect the date and time when you submit the form, and your response in the form. We won't collect any personal information about you. Please don't include any sensitive or personal information in your response.

Participation in this exercise is completely voluntary, and you can withdraw at any time before submitting this form. The response will not be submitted until you press the "submit" button at the end of this form.

What happens to the data?

By submitting your response you are providing consent for us to use your response to help us decide the direction of the SPRITE+ project. Your response will be aggregated with all other responses. We may use quotes from the responses we receive (for instance in articles or presentations), but these will never be associated with a specific individual or organisation. If we use a quote we will make sure that we remove any details that could identify particular people or organisations.

Further Information and contact details

This research has been funded by [EPSRC grant EP/S035869/1](#).

If you have any further questions, please do not hesitate to contact the Director of SPRITE+ (Professor Emma Barrett emma.barrett@manchester.ac.uk) or the SPRITE+ Network Manager (Dr Natalie Theodoulou natalie.theodoulou@manchester.ac.uk) at University of Manchester (HBS), Oxford Road, Manchester M13 9PL or via admin@spritehub.org
